

CARGO MANAGEMENT UNIT IN THEBES, GRECE

Thebes, Greece

Cargo Management Building

Roof Waterproofing System: Sikalastic®-612, Sika® Reemat Premium

PROJECT DESCRIPTION / NEEDS

For the new cargo management unit in Thebes, extensive renovation work on the 35'000 m² roof of the existing building with enlightened sections was required. The basic requirements were rapid delivery, application to existing substrate and a system resistant to ultraviolet radiation, featuring reflective properties.

APPLICATION / UTILIZATION

The Sikalastic® MTC liquid membrane system was proposed for the renovation of the building's roof. Sikalastic® MTC systems make it possible to realize design and architectural conception outside of the ordinary.

Main products / systems used:

- Sika® Bonding Primer
- Sika® Reemat Premium
- Sikalastic®-621 TC

CUSTOMER BENEFITS

The highly reflective Sikalastic® liquid membrane offered the advantage of easy application for complex details and was the ideal choice for the renovation of the existing roof, without interference of the ongoing operation works.
