Kalivia, Greece

Logistics Center

Roof Waterproofing System: Sikatherm® PIR, Sarnafil® TS 77-15 (RAL 9016)

---

## PROJECT DESCRIPTION / NEEDS

For a new logistics center, with a total area of tens of several thousand m<sup>2</sup> Sika offered Roofing and industrial flooring system solutions. There was a requirement for the application of a high performance roof system, in terms of thermal insulation properties and water tightness, with excellent resistance against weathering and permanent exposure to highest ultraviolet radiation.

## APPLICATION / UTILIZATION

The proven roof system with the highly reflective TPO based membrane Sarnafil TS 77-15 and the low conductive Sikatherm PIR thermal insulation was selected as the optimal choice.

Main products / systems used:

- Sikatherm® PIR AL
- Sarnafil® TS 77-15 (RAL 9016)

## CUSTOMER BENEFITS

The white Sarnafil® membrane is able to reduce heat absorption and to reduce both the cooling energy consumption of the building and the energy cost in the warm climate in Greece.
